SUMMARY

Python Developer with hands-on experience building backend applications and database-driven systems. Experienced with Python, SQL, PostgreSQL, debugging, authentication, and problem solving.

TECHNICAL SKILLS

Languages:	Python, SQL, C++, C
Backend & Web:	Python, CRUD, Authentication, JWT
Databases:	PostgreSQL, JSON
Libraries & Tools:	OpenCV, MediaPipe, PyAutoGUI
Developer Tools:	Git, GitHub, GitHub Actions, VS Code, Jupyter Notebook, Vercel, Render, Cursor, GitHub Copilot
Core Skills:	Problem Solving, Debugging, Database Optimization, Role-Based Access Control

PROJECTS

Hospital Appointment & Queue Management | [Live Demo](#)

Tech Stack: Node.js, PostgreSQL, Prisma ORM, JWT

- Engineered a secure appointment system, utilizing Prisma ORM and JWT to implement role-based access and prevent SQL injection.
- Optimized database performance by resolving N+1 query issues, reducing report-generation calls from $O(n \times 5)$ to $O(3)$.
- Ensured data integrity using atomic database transactions and improved scalability via database-level pagination.

Student Management System | [Live Demo](#)

Tech Stack: Python, JavaScript, HTML, CSS, JSON, Render

- Built a Python web application to manage student records with robust CRUD operations and server-side business logic.
- Implemented lightweight JSON-based data persistence for efficient record retrieval and state updates.
- Developed a responsive HTML/CSS/JS frontend and deployed the full-stack application on Render.

ACHIEVEMENTS & LEADERSHIP

- 100 Days of Code — Udemy:** Built 100+ Python mini-projects focused on clean code, scripting, problem solving, and data manipulation.
- Startup & Incubation Cell — PSIT:** Led student engagement initiatives and facilitated technical peer-mentorship programs supporting campus entrepreneurial activities.

EDUCATION

Pranveer Singh Institute of Technology (PSIT)

Kanpur, Uttar Pradesh | 2021–2025

Bachelor of Technology in Computer Science & Engineering
